For your convenience we compiled a list of companies that install backflow assemblies.

Summit Water DOES NOT endorse any of these companies.

Please make sure to get multiple quotes to ensure the best pricing, average cost is between $1,200 to $3,000.

Important Reminders:

* RPZ assemblies are NOT allowed to be installed below grade (crawl spaces, irrigation pits)
* They are designed to bleed water; the device needs to have an air gap and plumbed to a drain.
* All devices must be tested within 10 days of installation. Winter installations, can be tested prior to irrigation use.
* The cost for the RPZ and installation will vary depending on the current location.
* Not all installation companies can test, if they do not, you will need to contact a tester to complete the test.
* If you have questions on the type of RPZ to install, sprinkler supply companies can provide information.
* Common assemblies, but are not limited to: Wilkins 375 RP, 975 XL, Watts LF0009M, Apollo RP4A

If you are a company that installs and replaces backflow assemblies and would like to be added or to be removed from this list, please email summitwater@swdc.us.
