

For your convenience we compiled a list of companies that install backflow assemblies.

**Summit Water DOES NOT endorse any of these companies.**

**Please make sure to get multiple quotes to ensure the best pricing, average cost is between \$1,000 to \$2,500.**

**Important Reminders:**

- \* RPZ assemblies are NOT allowed to be installed below grade (crawl spaces, irrigation pits)
- \* They are designed to bleed water; the device needs to have an air gap and plumbed to a drain.
- \* All devices must be tested within 10 days of installation.
- \* The cost for the RPZ and installation will vary depending on the current location.
- \* Not all installation companies can test, if they do not, you will need to contact a tester to complete the test.
- \* If you have questions on the type of RPZ to install, sprinkler supply companies can provide information.
- \* Common assemblies, but are not limited to: Wilkins 375 RP, 975 XL, Watts LF0009M, Apollo RP4A

If you are a company that installs and replaces backflow assemblies and would like to be added to or be removed from this list, please email [summitwater@swdc.us](mailto:summitwater@swdc.us).
